

noraybanks

**Software for Biopreservation
and Biobanking Management**

noraybio
• NorayBG

Why NorayBanks?

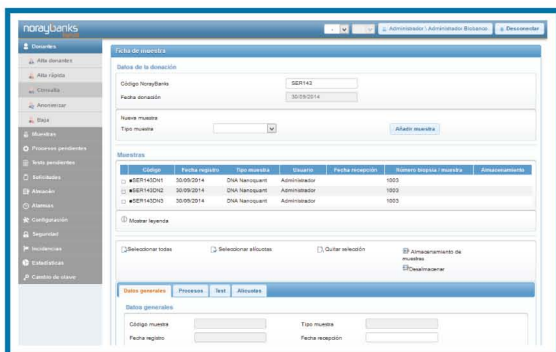

We believe that biobanks generate huge amounts of digital information that when correctly managed **provide new sources of economic value and fresh insights into science.**

How does it work?

The system **adapts** to the way you work and **effectively traces every process** that takes place at your biobank. Moreover, sample registration, processing, preservation, transfers, and analyses are all centralised in one system. NorayBanks **helps researchers gain access to an increasing number of samples** that you wish to share thanks to its configurable public web catalogue.

What is it?

NorayBanks is an **easy-to-use** all **web-based** software solution designed to help you with day-to-day biobanking activities. In addition, when dealing with human data, this solution guarantees **compliance** with biomedical research regulatory requirements, as well as with general research principles found in Europe regarding biospecimen banking activities. Last but not least, NorayBanks provides all the functionalities to fully comply with the **Personal Data Protection Acts.**

Key features of NorayBanks

Data protection

Compliance

User-friendly

Web based

Easy data transfer

Configurable

Scalable

Integrable

Ensures data traceability

Easy data retrieval

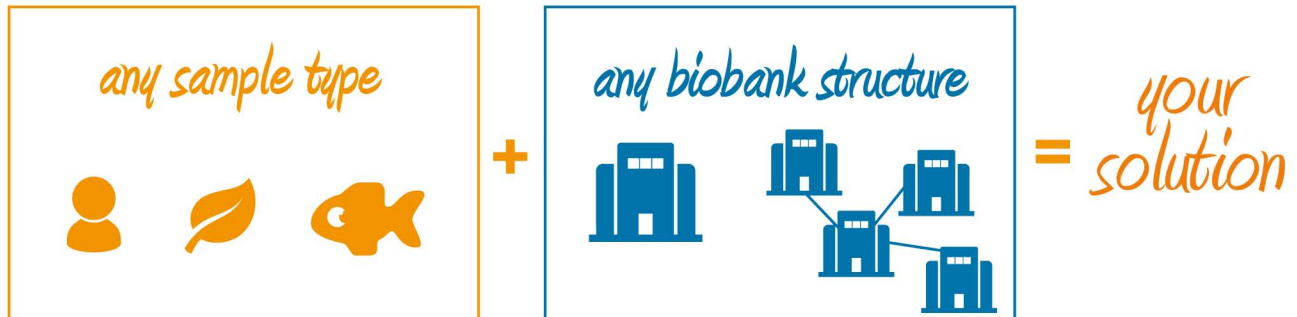

Web catalogue

Other features

No more, no less than what you need

NorayBanks suits...

NorayBanks makes the best of your collections

Perfect adaptation

Fits your needs.
The most versatile
product in the market.

Effective management

Adds value to your operations.
Your information is centralised
and easily retrieved when required.

Cost efficient

Towards becoming sustainable.
Connects your biobank with
scientists and other networks.
