

software for the management of biological samples

Do you want to share your samples through an online catalogue?

Benefit from an automatised system with real-time information that will prevent you from manually entering information.

Why noraybanks

Key features

User-customisable template-based software (data forms, codifications, sample types, storage...).

Search for any variable configured in the system, including customised ones.

Integrations with third-party software and equipment for workflow automation.

Bulk data import and modification tool.

Adaptable to any kind of biobank/lab structure (decentralised, network...).

Human Biobanking specifications

- Securitised patient information
- Compliant with regulations
- Management of informed consents

Animal Biobanking specifications

- Linked to AniBio for automatic exchange of information
- Full traceability of animal lifecycle, sampling time-points and organ collection

Any other origin

- Cell lines, organoids, strains...

NorayBio Software Platform

The perfect ecosystem for the management of the whole animal research cycle
